

## **WholeHomeReverseOsmosis.com has Officially Launched its New Website; Pay as Little as \$0.05 per Gallon for Reverse Osmosis Drinking Water**

*Kick the bottled water habit and save up to \$500 annually with an under sink reverse osmosis system. Plastic water bottles clog landfills and cost 100 times more than purifying water at home. Reverse osmosis water filtration saves money and the environment.*

February 23, 2010 (FPRC) -- Leading an effort to educate the public on the downside of buying bottled water, WholeHomeReverseOsmosis.com has officially launched its new website.

On the website, consumers will learn a large percentage of bottled water in the United States is just purified tap water. Instead of paying in excess of \$3 per gallon with bottled water, consumers can use reverse osmosis water filtration as a way to obtain ultra-purified water straight from the tap. In addition, by reusing a water bottle, Americans can prevent over a billion plastic bottles from going to a landfill in a year.

Reverse osmosis water purification provides consumers pure drinking water from the tap at over 99% reduction in cost per gallon as compared to bottled. Recent studies by the Food and Drug Administration has shown that bottled water is not necessarily better for you than tap water as both may contain chemicals and bacteria harmful to your health. A simple under sink reverse osmosis system can remove these substances for about \$0.05 per gallon.

WholeHomeReverseOsmosis.com custom builds reverse osmosis systems to each customer's order depending on the specific needs of the client. For example, a homeowner using well water will have different filtration needs than a client using a municipal water supply. A free consultation is provided to determine the needs of the customer.

The reverse osmosis systems available are built in the USA utilizing professional grade components straight from the manufacturer to save on costs. Systems are customizable from 4 stages of filtration all the way up to 9 stages. With over 15 years of experience, the manufacturer for WholeHomeReverseOsmosis.com has the experience to supply the best reverse osmosis system at a great price. For a limited time, customers will enjoy free shipping on any complete reverse osmosis system and, by referring a friend, existing clients can earn free replacement filters or even cash.
