

## **WeightLossProduct.org Offers Weight Loss Supplements To Help You Shed Pounds In Time For Spring**

*Shedding excess weight this spring can be easy with weight loss supplements from WeightLossProduct.org. The company offers unbiased reviews of many weight loss products so customers know they're getting a product that will work for them.*

February 23, 2010 (FPRC) -- PROVO, UT - The cold weather of winter often brings excess weight, but spring symbolizes new beginnings for many people looking to start over and shed those extra pounds. For anyone who wants to give their weight loss a boost, improve their energy levels and look better, WeightLossProduct.org offers a number of popular weight loss supplements.

Losing weight with traditional diet and exercise may only get someone so far. Many people are discouraged by the slow process of weight loss and that's where weight loss pills can be useful. These supplements can help speed up fat loss while suppressing appetites and building muscle.

"It's common knowledge that many people put on a few pounds over the winter months. The holidays centered around food and family and the cold weather means that people are more sedentary than they would be during the summer months. Couple this with the fact that many people are able to hide behind big, bulky winter clothing and you have a recipe for weight gain. Shedding pounds this spring doesn't have to be difficult and weight loss supplements can give you the jump start you need," said Chris Kuchin, Consultant for WeightLossProduct.org.

WeightLossProduct.org helps those looking to lose weight narrow down and wade through the numerous weight loss products on the market today. The site ranks over 40 different products on 10 criteria: weight loss power, ingredient quality, customer feedback, product safety, speed, reorder rates, company reputation, customer service, long-term results and the overall value of the product. The company's top pick is LipoFuze, which works by increasing muscle mass. The formula for LipoFuze is based off of years of scientific research.

Another of WeightLossProduct.org's top choices is Nuphedragen, which ups metabolisms and suppresses appetites. Additionally Nuphedragen helps inhibit the harmful hormones that cause metabolisms to slow, therefore increasing weight gain.

Other products rated highly by WeightLossProduct.org include 7-DFBX, AmbiSlim and the 72 Hour Slimming Pill.

"We know there are a number of weight loss products on the market and it's our goal to make the selection process as easy as possible on our customers. In addition to our extensive, unbiased ranking system, anyone looking for weight loss products can easily find the lowest prices on popular products such as LipoFuze, Nuphedragen, 7-DFBX, AmbiSlim and the 72 Hour Slimming Pill . Whether you have a lot of weight to lose, or just want to shed a few pounds, we can help you meet your goals," said Kuchin.
