

## **Titanium-Jewelry.com Introduces New Men's Wedding Bands By Triton**

*Handsome, one-of-a-kind men's wedding rings feature artisan styling, contemporary metals and diamonds*

March 5, 2010 (FPRC) -- Titanium-Jewelry.com, a trusted online resource for men's wedding bands and matching wedding bands, introduces the addition of new men's rings from Triton. The three stunning new men's rings fashioned of carbon fiber and tungsten include the Wilton, and the Brockton and Raine styles, the latter of which contain bezel set round brilliant diamonds.

"Times have changed and men are seeking alternatives to the traditional gold wedding band. Our new men's Triton wedding bands let grooms express themselves with style, sophistication and unmistakably masculine rings," said Ron Yates, founder, Titanium-Jewelry.com. "The Triton tungsten rings make the perfect wedding bands for the modern guy who wants something different and likes making a statement."

Designed for today's man, Triton combines inspired artistry and innovative engineering with the most exciting contemporary metals to deliver a collection of bold, masculine styles. The Wilton tungsten carbide ring features a generous strip of carbon fiber that runs unbroken the entire circumference of the ring. The edges of the tungsten band are beveled and the band has a smooth comfort fit interior so the ring is as comfortable to wear as it is stunning. A truly remarkable men's wedding band, this men's ring is characteristic of Triton's refined elegance and attention to detail.

The Raine by Triton takes the same basic design of the Wilton, black carbon fiber inlaid between scratch proof tungsten carbide ring, showcasing a round brilliant diamond bezel set for a stunning piece of artistry and statement men's wedding band. The diamond is .05 carat and carries a lifetime warranty. The top of the ring has a soft satin finish and the beveled edges are high polished.

The Brockton tungsten carbide ring by Triton features a generous strip of black carbon fiber nestled between the scratch-proof tungsten carbide ring and is intersected by the round brilliant diamond. In the middle of the 8-mm wide tungsten ring is a round brilliant diamond bezel set. The diamond is a .05 carat and carries a lifetime warranty. The top of the ring has a soft satin finish and the beveled edges are high polished for a distinguished look unmatched by any other men's ring.

In addition to wedding bands by Triton, Titanium-Jewelry.com offers sophisticated designs from ArtCarved, Benchmark, COGE, Diana Classic, Edward Mirell, Formotion Watches, J.R. Yates and the Belloria Black Diamond collection for her. Enticing grooms and couples worldwide, the online retailer provides a multitude of styles and metals representing the best selection of palladium rings, titanium rings, tungsten rings, and men's wedding bands for the fashion forward male and female demographic.
