The ExamSim is intended for candidates preparing for CCNA certification, and enables one to prepare thoroughly for certification exam in a simulated test environment.

April 7, 2010 (FPRC) -- CertExams.com, a leading exam simulators provider has recently released a revised version of Cisco CCNA exam simulator. CCNA Certification is awarded by Cisco Systems on successful completion of qualifying exam(s). CCNA is intended for candidates who have just started working on Cisco routers and switches. For candidates aspiring for CCNA certification, CertExams.com CCNA Exam Sim provides an excellent simulated exam environment. The advantages of using CCNA exam simulator include the following:

The package consists of 300 questions in 3+ tests with:

- CCNA Simlet type of questions
- CCNA Testlet type of questions
- Network simulation questions
- Single choice multiple answer, and
- Multiple choice single answer questions

Probably, this is the only practice exam that provides complete range of CCNA question types including simlets and simulations.

The exam objectives covered by CCNA certification include the following:

1. Describe how a network works
2. Configure, verify and troubleshoot a switch with VLANs and interswitch communications
3. Implement an IP addressing scheme and IP Services to meet network requirements in a medium-size Enterprise branch office network.
4. Configure, verify, and troubleshoot basic router operation and routing on Cisco devices
5. Explain and select the appropriate administrative tasks required for a WLAN
6. Identify security threats to a network and describe general methods to mitigate those threats
7. Implement, verify, and troubleshoot NAT and ACLs in a medium-size Enterprise branch office network.
8. Implement and verify WAN links

Other products offered by CertExams.com include the following:
