

Save money with Energy Star Qualified Thermostats from DtiCorp.com

Homeowners can save about \$180 a year by properly setting their programmable thermostats and maintaining those settings. The pre-programmed settings that come with ENERGY STAR qualified programmable thermostats are intended to deliver savings without sacrificing comfort.

April 19, 2010 (FPRC) -- Fort Lauderdale, FL - Popular Honeywell online retailer DtiCorp.com (<http://www.DtiCorp.com>) is introducing 36 Brand New Energy Star Qualified Honeywell Programmable Thermostats. ENERGY STAR is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy helping Americans to save money and protect the environment through energy efficient products and practices.

Using a programmable thermostat in your home is one of the easiest ways to save energy, money, and help fight global warming. An ENERGY STAR qualified programmable thermostat helps make it easy to save energy and money by offering four pre-programmed settings to regulate your home's temperature in both summer and winter "when you are asleep or away."

Products that earn the Energy Star prevent greenhouse gas emissions by meeting strict energy-efficiency guidelines.

The average household spends more than \$2,000 a year on energy bills "nearly half of which goes to heating and cooling. Homeowners can save about \$180 a year by properly setting their programmable thermostats and maintaining those settings. The pre-programmed settings that come with ENERGY STAR qualified programmable thermostats are intended to deliver savings without sacrificing comfort.

Heating and cooling losses from a building become greater as the difference in temperature increases. A programmable thermostat allows reduction of these losses by allowing the temperature difference to be reduced at times when the reduced amount of heating or cooling would not be objectionable.

Honeywell Programmable Thermostats provide the ability to automatically adjust for unique lifestyles, controlling home comfort to the desired temperature at the desired time. They do the work for the homeowner automatically when they are away or asleep. And the big benefit is energy savings - up to 30% on home heating and cooling costs - by adjusting the temperature up or down, thereby reducing equipment run-time. Honeywell combines the convenience of schedule selection with precise temperature control to deliver superior programmable thermostats.
