

CertExams.com NetSim for CCNA

CertExams.com, a leading network simulators provider has recently updated its CCNA NetSim to handle real-time activation using XML. Several new features are also added to the application that include additional labs, improved help file, and support for multiple licensing using new XML-based registration system.

April 23, 2010 (FPRC) -- CertExams.com, a leading network simulators provider has recently released a revised version of Cisco CCNA NetSim. CCNA Certification is awarded by Cisco Systems on successful completion of qualifying exam(s). CCNA is intended for candidates who have just started working on Cisco routers and switches. For candidates aspiring for CCNA certification, CertExams.com CCNA Network Simulator provides an excellent simulated network environment for hands-on practice. The advantages of using CCNA network simulator include the following:

- Lab exercises for hands-on practice.
- Router and switch simulator.
- Simulate Cisco® IOS routers (805, 806, 1710, 1720, 2501, 2503, 2610, 2620, 2621, 3620, 3640) or switches (1912, 2950, 2960-8TC-L, 2960-24TT-L).
- Connectors available are Serial, Ethernet, IsdnBri, Frame Relay, Fast Ethernet.
- Detailed Lab Manual provided.
- Support for 200+ router and switch commands.
- Labs for 1900,2950 switches and 25xx/26xx routers included.
- Detailed help files.
- Network designer that provides drag and drop feature for inserting devices and connectors. GUI based device configurator.

Support short form commands is provided. You can type short form commands in IOS simulator for router/switch commands just like in actual router/switch.

The exam objectives covered by CCNA certification include the following:

1. Describe how a network works
2. Configure, verify and troubleshoot a switch with VLANs and interswitch communications
3. Implement an IP addressing scheme and IP Services to meet network requirements in a medium-size Enterprise branch office network.
4. Configure, verify, and troubleshoot basic router operation and routing on Cisco devices
5. Explain and select the appropriate administrative tasks required for a WLAN
6. Identify security threats to a network and describe general methods to mitigate those threats
7. Implement, verify, and troubleshoot NAT and ACLs in a medium-size Enterprise branch office network.
8. Implement and verify WAN links

Other products offered by CertExams.com include the following:

1. CCNA Exam Simulator: The only practice exam that provides complete range of CCNA question types including simlets and simulations.

2. Juniper Junos Simulator for JNCIA
