

Improved Virtualization Solutions Found Through Consonus and Akorri Partnership

More extensive IT managed services are now available with the announced partnership of Consonus and Akorri. Clients will be able to dynamically analyze the IT infrastructure for clients with the new BalancePoint™ tool from Consonus.

May 11, 2010 (FPRC) -- CARY, NORTH CAROLINA -- Last week, Consonus, an industry leader in IT managed services, announced their newly formed partnership with Akorri. With this partnership, Consonus will be releasing the newest version of BalancePoint that will improve IT and virtualization solutions by 100% and reduces troubleshooting time associated with IT infrastructure by up to 80%. Many BalancePoint customers have found return on investment (ROI) within a few months.

Consonus will be holding a special web event on Thursday, May 13th at 12:00 p.m. EDT to debut the improved IT managed services and analytical data information now available through Consonus and BalancePoint.

"Our partnership with Akorri enhances Consonus' world-class virtualization solutions by offering extensive analytical data that identifies ways to optimize the IT infrastructure. Through the use of BalancePoint, the IT managed services available from Consonus are made simpler by reducing time spent troubleshooting and increasing performance," said Steve Bulmer, Consonus Chief Technology Officer.

BalancePoint performs agentless cross-domain analysis of data storage, as well as physical and virtual servers. With the addition of Akorri's valuable analytics tools, Consonus can map and analyze the complete IT infrastructure. Through this, clients are able to determine the best balance of performance, efficiency and cost increasing their ROI. Clients also can more quickly identify problems and ways to optimize their virtualization solutions and IT managed services with the Performance Index and Virtual Machine Scorecard.

"Being able to accurately predict future capacity needs and performance is important when it comes to budget planning. Customers who take advantage of BalancePoint can virtualize more of the business-critical applications, thereby reducing costs and maximizing efficiency," said Warren Mead, a vice-president of U.S. Channels for Akorri.

Anyone that is interested in learning more about BalancePoint and the improved IT managed services available from Consonus can register for the Thursday, May 13th special web event at <http://www.consonus.com/events/balancepoint-webcast.php>.
