

Lace Front Wigs First Ever Complete E-book is Now Available at LaceFront-Wig.com

A leading online retailer of lace front wigs, LaceFront-Wig.com, has included an E-book Guide to better serve their customers in choosing the right lace front wig and caring for them.

May 20, 2010 (FPRC) -- JACKSONVILLE, FL - LaceFront-Wig.com, the leading online retailer and maker of custom and in-stock lace front wigs, has announced their first complete E-book aptly named 'Celebrity Hair Secrets Exposed: The Must Have Handbook on Buying and Maintaining Lace Wigs' by Julia Strunk. This informative yet entertaining E-book uncovers the secrets to put an end to bad hair days. Giving expert advice to fix any hair problem, whether it is too thin, straight, curly or fine, this book is a must-have item when deciding whether or not to purchase a lace front wig.

Julia Strunk understands what women go through with hair that is hard to style or manage. This struggle can make a person's day-to-day life more difficult than it needs to be. No matter how much time or money is spent on new hair products, styling and going to salons, the dilemmas never change.

Hair extensions, hair weaves and many wigs for black women offer little to no solution, as the condition of the hair tends to worsen after using these treatments. Lace front wigs on the other hand are more natural looking, less intrusive and most times made from Remy hair, which is the best quality hair available.

"The book was written with a sole purpose of making sure you get your money's worth and much more with every lace wig you buy. Within the book, I go into detail about the types of hair used, how the lace front wigs are fitted as well as the different types available. You will also learn little tricks by celebrities to ensure their wigs look beautiful, including how to select different types to fit individual personalities, choosing the right lace color for your existing hair color and/or complexion and much more," said Julia W. Strunk, Vice President of Sales and Marketing for LaceFront-Wig.com Inc..

In the past, lace wigs have been an well-kept celebrity secret trend and have not been readily accessible to the public. A lace front wig is made from 100% Remy human hair, providing the most natural looking, far more realistic than all of the other hair extensions on the market. When applied, these wigs look like they are growing from the scalp, offering an ideal solution for any significant hair loss. They are non-intrusive and do not damage any existing hair as weaves, extensions and perms can do. Additionally, these wigs are one of the most affordable hair extension options around today.

This E-book contains in depth information necessary to know about buying and wearing lace wigs from helping people choose the perfect lace wig for themselves as well as preserving the investment once the wig is acquired.

About LaceFront-Wig.com Inc.:

LaceFront-Wig.com was launched out of necessity by Julia W. Strunk when she started noticing hair loss. As an executive in the hair industry, Strunk was looking for superior quality hair that looked natural. When she didn't find the quality wigs she desired, Strunk saw a void in the market of wigs for black women and started the company.
