

Free Electronic Cigarette Kit Offer Now at ElectricCigaretteSale.com

A free electronic cigarette kit offer is now available at ElectricCigaretteSale.com for anyone who wishes to try the product and find out whether this alternative to smoking tobacco cigarettes is acceptable.

June 13, 2010 (FPRC) -- The publishers at ElectricCigaretteSale.com are pleased to announce a new Free Electronic Cigarette Kit Offer. This offer allows their visitors to try the alternative smoking product for free and just pay the shipping cost.

The electronic cigarette kit trial offer has everything you need including a 5 volt long life battery, 10 cartridges in choices of "full," "ultra light" or even "no nicotine," a wall charger with a cord, and an atomizer.

Normally, an electronic cigarette kit that includes items like those listed above retail for \$100 to \$125 or more. The publishers realize this may prohibit many people from trying this type of e-cigarette product. They are very happy to be able to now help people who wish to experience "vapor" smoking a chance to do so at a minimal cost (just pay low shipping cost).

In addition, this particular free e-cig kit uses only 100% american made nicotine solution. The reason this is important to note, is many electronic cigarettes, even well known brands, use a lower quality nicotine solution that does not meet the high standards of 100% american made items.

It is unfortunate that some manufacturers of electric cigarettes use "Nicotine Absolute" in order to save money in their derivation of nicotine. This does not remove several of the carcinogens that naturally occur in the tobacco plant.

With this free electronic cigarette kit offer, you can be assured you will be receiving quality products and 100% american made nicotine solution.

If you have been wondering if you would like using this alternative smoking product (actually vaping, no smoke is emitted), then visit the website for details on the free trial offer.
