

MantelsDirect.com Now Offering \$100 Off Entire Line of Perfect Outdoor Fireplaces™

A leading online retailer of outdoor fireplaces, MantelsDirect.com, has discounted their popular line of Perfect Outdoor Fireplaces™ just in time for summer.

June 21, 2010 (FPRC) -- FLORENCE, AL - MantelsDirect.com, a leading online retailer of high quality fireplace mantels, fireplaces and fireplace accessories, is now discounting their quality Perfect Outdoor Fireplaces™ as an extra incentive for their customers. Not only are these outdoor fireplaces affordable, durable and easy to assemble, but they also create an inviting atmosphere for any outdoor living space.

Classified as a recreational fire, these fireplaces can be burned year round. Made out of heat-dissipating stone, the fireplace will withstand heat, snow and rain. Each outdoor fireplace has a modular design with interlocking pieces that can be assembled easily without glue or mortar. As seen on HGTV, each of these fireplaces is made in the USA, complete with free shipping.

Aptly named Perfect Outdoor Fireplaces™, each fireplace can be tailored to meet anyone's needs with three different combinations including one that can burn wood, one that can burn gas along with different combinations of doors and screens. The wood-burning fireplace is ideal for cooking or to create a nice, crackling fire. The gas log versions use natural gas or propane and are excellent for those who do not want to bother with the wood and simply enjoy the warmth of the fireplace in the backyard.

Each outdoor fireplace can be personalized with a variety of colors including pewter, sandstone, tan, taupe and tan on copper or add brick or stone for a custom look. The doors have optional decorative handle designs which include cactus, horses, quail, standard and trees. Customers can also choose if they want their unit to have an exposed front, see-through or screened on the left and right sides or all four sides in the multi-screen version. This version allows the fire to be viewed from all sides. Further, Perfect Outdoor Fireplaces™ has a barbecue addition with adjustable three-position grill.

"As summer is just around the corner, more and more people are beginning to spend their days and nights in their backyard and what better way to create an inviting atmosphere than with the outdoor fireplace. The Perfect Outdoor Fireplaces™ offer our customers a customized look that easily incorporates into any outdoor living space," says Rick Morse, CEO of MantelsDirect.com.

In addition to the Perfect Outdoor Fireplaces™, there are outdoor fire pits, fire bowls and chimeneas that have become increasingly popular and are equally inviting.
