

Two New Anti-aging Skincare Products Released By Dr. Brandt Skincare

Dr. Brandt Skincare, developers of the popular time arrest® anti-aging skincare products, has released two new products: time arrest® crème cleanser, and time arrest® to go, recently added to the arsenal of age-reversing skincare products.

June 29, 2010 (FPRC) -- NEW YORK, NY -- Dr. Fredric Brandt, a renowned celebrity dermatologist, has announced the release of two products to the time arrest® anti aging skincare collection. Dr. Brandt's time arrest® is formulated with age-reversing platinum technology, a highly effective delivery system that carries vital ingredients deeper into the epidermis, helping lift, firm and tighten sagging, aging skin.

"Time arrest® represents a quantum leap in the way we're able to deliver active anti-aging ingredients into the skin," said Dr. Fredric Brandt.

The time arrest® creme cleanser (3.7 oz, \$50) is a conditioning cleanser that allows the skin to absorb vital ingredients to the deepest levels of the skin and prepares the skin to maximize the performance of the age-reversing platinum technology.

time arrest® to go (\$75) puts Dr. Brandt's time arrest® anti-aging products into a convenient, travel-size kit, including:

1) time arrest® crème cleanser (0.7 fl. oz): A creamy conditioning cleanser that restores skin's natural moisture barrier and effectively prepares skin to enhance the performance of Dr. Brandt's Age Reversing Platinum Technology.

2) time arrest® crème (0.35 oz): An innovative firming and restructuring cream that uses a proprietary Platinum delivery system to firm and tighten skin for a more 'lifted' appearance.

3) time arrest® v-zone neck cream (0.35 oz): A targeted anti-aging treatment that stimulates cell turnover to improve skin's surface texture while delivering intense hydration to smooth, tighten and firm the skin.

4) time arrest® to go also includes sample packets of dr. brandt® collagen booster, time arrest® eye serum, time arrest® laser tight®, time arrest® face fluid

About dr. brandt skincare:

World-renowned celebrity dermatologist Dr. Fredric Brandt has designed & formulated an innovative collection of anti-aging skincare products that offer high-performance targeted treatments without the need for a prescription or doctor's appointment. Developed at his prominent research institute, this technologically advanced line of professional products combines years of Dr. Fredric Brandt's scientific knowledge and clinical expertise with active botanicals for exceptional skincare that helps maintain radiant, healthy, age-less looking skin...always.
