

Boutique Hotels in Florence Offer Free Guide to Discover all the Secrets of the Cradle of Renaissance

Florence, Venice and Rome are some of the most beautiful cities in the world, and those who are fortunate enough to travel to Italy and visit these places in person are in for a real treat.

July 7, 2010 (FPRC) -- Now, visitors to Florence and other Italian cities can get an insider's scoop on how to best spend their vacation time, before they even step inside an airport.

The team at History and Palace Hotels has put together several free tourism guides that users can download for free direction from the History and Palace website. Whether you are staying in Florence for 2, 4 or even 7 days, their free tourism guides showcase the essential places you must visit, along with interesting historic information about each museum and monument, traditions and local events.

In order to help you plan your daily itinerary, the guides also contain a map of the city that pinpoints each of the selected attractions featured in the guide. Downloading this guide before you even arrive in Florence boutique hotels will give you more time to adequately plan your activities, which will help to make your vacation even more of a success.

Adjacent to each attraction in the guide is a web address for that particular attraction that will lead you to information concerning pricing, hours of operation, special considerations, and more. This guide also contains contact information for a variety of tourist offices and information centers, as well as contact information for various forms of transportation you may be interested in using during your stay in Florence and the surrounding countryside.
