

Calusa Creek to Attend 2010 TXNLA Expo

TXNLA Expo will discuss various techniques of water conservation in the landscape industry.

August 10, 2010 (FPRC) -- August 9, 2010 (FPRC) -- Calusa Creek Representatives to Attend the TXNLA Expo for the Ninth Consecutive Year!

The 2010 Texan Nursery & Landscape Association Expo is fast approaching, and Calusa Creek Tree Farm will be proud to announce that Operations Manager Glen Hegedus, and Sales Manager Meredith McIntosh will be attending the three day event from August 20-22, 2010.

In addition to having an opportunity to say hello to longtime friends and colleagues, Glen & Meredith are eager to meet with the many experts that will be addressing the EXPO from all facets of the landscape industry. Of particular interest will be the forums and discussions which address water conservation as it relates to modern day landscaping planning. This is the most important issue facing the industry today.

Maintaining a reliable supply of fresh water has become a critical issue to nearly every community, especially in the south. Glen Hegedus believes "Nurserymen and landscapers alike will play an increasing role in controlling whether or not a community will be able to live within the means of the local water reserves".

Meredith recently noted "It is estimated that up to 25% of a community's water supply is consumed by landscaping and garden watering". As the Sales Manager at Calusa Creek, she believes "we need to pool our collective talents and do the best possible job of educating the public decision makers on the latest water-conserving techniques as it relates to the landscape design and landscape maintenance".

If you are going to be in the San Antonio area during August 20-22, both Glen & Meredith encourage you to stop by booth #2744 and say 'hello'.
