

Liver Cancer Cure Now Announces Cancer Cure that Costs Nothing!

The FDA doesn't want you to know that you can cure cancer for free. If this were to become common public knowledge, a trillion dollar per year industry would be at risk. And with Big Pharma at risk, the FDA's funding would dry up.

August 10, 2010 (FPRC) -- Rick G. House, Liver Cancer Cure Now's general manager, announced today "The FDA doesn't want people cured. Many people don't realize that the Food and Drug Administration is funded by the big pharmaceutical companies, aka Big Pharma. They have an agenda, and that agenda is all about money and power. Health is irrelevant".

Years ago, Congress sold out the American people, passing into legislation a bill that allowed the FDA to be funded by the big pharmaceutical companies. Big Pharma rakes in billions of dollars per year on expensive treatments. Since the FDA depends on Big Pharma for its life blood (funding), we can rest assured that they will never approve a safe, effective, inexpensive cure for any disease. That would threaten Big Pharma and the FDA's funding, so that will never happen.

Mr. House further commented: "Shocking as it may sound, cancer can and has been cured for free. Anyone can dig up dandelions from their lawn and cure cancer. Don't buy the dandelion products in the health food stores. Those won't cure cancer. Instead, harvest your own dandelion roots. Take a handful, cut the leaves off, and do not wash. Dry at 100 degrees (an incubator without water works well, taking 5-6 days). A food dehydrator is great, or you can even improvise with a light bulb. Test a root by breaking it. If it snaps, it's ready to powder. Do Not use an electric grinder. If you have a pestle & mortar (like pharmacists use to crush pills), that's perfect. If not, take an iron frying pan and a clean hammer. Place one root at a time in the frying pan and start tapping. Don't hit hard or pieces will fly everywhere. A good tip is to keep your hand around the root to keep most of it in the pan. If it sticks to the hammer and pan, it isn't dry enough. Dosage: take a little over 1/2 teaspoon once/day in water or juice. Curing Cancer can be that simple".
