

Promos On-Time Unveils New Employee Gift Line

Promos On-Time has unveiled its new line of employee appreciation gifts. The stock designs are ideal for every profession or organization.

August 18, 2010 (FPRC) -- In an attempt to offer low quantity gifts for employers to give to their employees, Promos On-Time has unveiled their new product line. The online distributor of promotional products was hearing from customers about the need for gifts that were already designed and came in quantities that did not require an army sized workforce.

The company offers about 75 products with a diverse array of themes from safety incentives to employee appreciation. They even have profession-specific designs for teachers, volunteers, nurses and customer service staff members. The slogans and corresponding graphic are both unique and eye catching, so recipients can use the items with pride.

The product line includes mugs, tote bags, back packs, mouse pads and other useful items that employees will enjoy using on and off the job. One of the most popular graphic designs is the "I Am A Vital Piece To My Organization" theme with an illustration of a missing puzzle piece.

The company's gift manager, Germaine Dennis, says "smaller companies have really appreciated the line because they can find a ready made solution for their team without breaking the bank". She also points out that larger companies and schools with small individual staffs have also taken to the gifts. Plus, prices are typically under five dollars, so there is something for every budget.

With quantities as low as 20 pieces and the ability to print some custom copy beneath the stock graphics, the company feels they have come up with a solution for every company's human resource appreciation and motivation program.
