

Buildings Express Releases Free Steel Building Website Content

BuildingsExpress.com, a free resource for consumers and steel building vendors, releases free steel building website content for webmasters in the fabrication, construction and sale of metal buildings.

August 23, 2010 (FPRC) -- BuildingsExpress.com, a free resource for consumers and steel building vendors, releases free steel building website content for webmasters in the fabrication, construction and sale of metal buildings.

Now Available at Buildings Express-Free Resources

Buildings Express, the internet's leading resource for online information about steel and metal buildings, will allow specified content to be reproduced in an effort to help eliminate confusion about the metal building industry. Articles, definitions, guides, listings and FAQs will be released for free reproduction and redistribution by any website starting August 23, 2010.

This shared content is clearly marked and it may be copied by any online resource free of charge, under the license agreement for that specific content.

Coming Soon-Additional Free Content Resources

Buildings Express is developing several tools that may be used by any website, in addition to the free content. These tools will include square footage calculators, roof pitch and square footage calculators and a simple tool which will allow customers to design their own floor plan as part of their bid request.

These tools are expected to be released before the end of the year.

About Buildings Express

The team and Steel Buildings Express has collected in to a single web site all of the information that a consumer may need when researching nearly any aspect of purchasing or assembling a steel building.
