

Reid Supply Offers Free CAD Drawings To Students And Engineers

Reid Supply, an internationally known distributor of industrial supplies, offers free CAD drawings to students from its extensive CAD library. Students can find CAD drawings and valuable online tools on the Reid Supply website.

September 3, 2010 (FPRC) -- MUSKEGON, MI – Reid Supply, an international distributor of industrial supplies, is providing valuable CAD drawings for free to students producing design projects, entering engineering competitions, or simply looking for ways to enhance their understanding and skills in Computer Aided Drafting. The company is a leading industrial supplier of free CAD images to colleges, universities, trade schools and high schools. Engineers and technicians in a variety of industries can also take advantage of the enhanced CAD access at ReidSupply.com.

"Today's engineering and technical students must be able to understand and work with CAD drawings in order to perform in any industry. There are also numerous competitions at the high school and college level for all types of engineering and robotics. We offer valuable CAD drawings for free to students and young engineers entering the workforce, giving them the materials needed to succeed," explains Greg Palmer, Director of Marketing at Reid Supply.

Students, professors, engineers and technicians can all take advantage of the company's extensive library of CAD images for engineering projects. As a leader in industrial parts distribution, Reid Supply is proud of its impressive library of CAD drawings and industrial parts data.

Reid Supply currently has more than 40,000 CAD images that can be viewed and downloaded. The company's unique 3D CAD viewer allows visitors to look at CAD images in three dimensions. Reid Supply's impressive CAD library currently offers both 2D and 3D CAD drawings of over 90% of the company's cataloged industrial products. Because Reid Supply furnishes industrial products to most of the major engineering and manufacturing industries, students have access to free CAD drawings that are relevant to the automotive, aerospace, construction, food, energy, and packaging industries as well as government, medical, and engineering fields.

"We don't stop at just offering CAD drawings. We also have Reid SupplyLine, a knowledge database that offers resource guides, engineering data and references, online tools and calculators, reference manuals, and even an eNewsletter manufacturing and other topics. It's easy for anyone to find the CAD they need using our site's CAD search by RS part number and a batch download. For anyone who has trouble locating the drawings they need, we also offer a special request service. We want to see engineering students succeed, and our CAD library is one way we can help," concludes Palmer.

About Reid Supply Company:

Reid Supply Company, a global industrial products distributor was founded in 1948 and serves a variety of industries in the United States and over 57 foreign countries. The company offers outstanding customer service and a full stock of hard-to-find industrial parts. The company is proud to offer downloadable CAD drawings of over 90% of the company's cataloged industrial products as well as comprehensive Resource Guides for manufacturers.
