

Attention Quickbooks Users! QuickBooks Compatible MICR Check Printing Software at \$0 Cost

ezCheckprinting software is trusted by thousands of users. It save users both time and money each day. The new version of this check writing and printing software allows user to print QuickBooks MICR check easily.

October 2, 2010 (FPRC) -- Quickbooks users now can print MICR blank checks easily from the laser printer with the new version of ezCheckPrinting software from halfpricesoft.com. And the best of all, you can even get this software for FREE.

"We found most software on the market were too complex and too expensive for small business owners," said Halfpricesoft.com founder Dr. Ge. "We believe small business owners should focus their time and energy on running their businesses, not trying to figure out how to run the software. We wanted to build something that was user friendly, super simple, affordable & totally risk free."

There is no frustrating learning curve, and checks can be printed as soon as a business owner installs the check printing application. One of the main goals of ezCheckPrinting software designers is to make sure that the product is easy to use - even for people who may not have much experience. The software can also serve as a check management system that ensures that check information is stored and organized in one secure place. Generate a printed report for the checks paid for a particular customer, or use the report export function to help prepare for tax season and itemize those valuable deductions and business expenses.

This affordable, super-simple, custom streamlined check writing and printing software - available at http://www.halfpricesoft.com/product_ezCheck.asp - was designed with direct input and guidance from those who use it "in the trenches" every day. The newly upgraded version of the already popular product was updated with new report format and import/export data features, plus other intelligent changes recommended by customers.

Some main features include :

- Support 3-Per-Page, Check-on-Top, Check-in-Middle, and Check-on-Bottom options.
- Print checks from blank computer check paper or pre-printed checks.
- Print pre-printed blank checks to fill in manually at a later time or to use with other software such as Excel file, Quicken, QuickBooks and Microsoft Money.
- Data Import/Export features
- Support Multiple accounts
- Report feature

Never reorder checks - which often results in costly delays and fees.

Free up human resources for higher productivity and more sustainable savings, as check printing and writing software saves time and reduces labor and accounting errors and mistakes. Users can also customize their checks to distinguish themselves and promote company identity and marketplace recognition. Each time a check is printed it enhances the business image and strengthens brand identity as free advertising. Choose from various font sizes or add a custom logo to checks, for an added touch that separates a business from competitors and gives customers

added confidence in the company's professionalism.

Best of all, users can now get the software and the check printing paper absolutely free by using the special TrialPay offer. TrialPay lets customers pay for products from more than 7,500 online sellers and, for example, a consumer could buy clothing from the GAP or other retail partners and get a full license to use ezCheckPrinting software or check paper free of charge.
