

Group Exposes The Fraudulent Nature Of Psychiatric Labels.

There are no genetic tests, no brain scans, blood tests, chemical imbalance tests or X-rays that can scientifically/medically prove that any psychiatric label is a real medical condition.

March 12, 2011 (FPRC) -- Vancouver— A new must-see video produced by the Citizens Commission on Human Rights International graphically demonstrates the fraudulent nature of all psychiatry's labels.

The children in the video rip off their bogus psychiatric label and show a genuine label of their true nature. The name under the label of one child labeled with Attention Deficit Disorder (ADHD) is simply "Kid".

In real life, 20 million children are now wearing these labels that are based solely on a checklist of behaviors. There are no brain scans, x-rays, genetic or blood tests that can prove the scientific validity of any of the psychiatric labels, yet these children are prescribed dangerous and life-threatening psychiatric drugs based on nothing more than the invented label.

Child drugging is a \$4.8 billion-a-year industry.

The psychiatric/pharmaceutical industry spends billions of dollars a year in order to convince the public, legislators and the press that these labels such as Bi-Polar Disorder, Depression, (ADD/ADHD), Post Traumatic Stress Disorder, etc., are medical diseases on par with verifiable medical conditions such as cancer, diabetes and heart disease. This is simply a way to maintain their hold on a \$84 billion dollar-a-year psychiatric drug industry that is based on marketing and not science.

Brian Beaumont, president of the Vancouver chapter of the Citizens Commission on Human Rights (CCHR) said, "Unlike real medical disease, there are no scientific tests to verify the medical existence of any psychiatric disorder. Falsely labeling children is fraud and drugging these children is child abuse".

Despite decades of trying to prove mental disorders are biological brain conditions, due to chemical imbalances or genetic factors, psychiatry has failed to prove even one of their hundreds of so-called mental disorders is due to a faulty or "chemically imbalanced" brain".

The Citizens Commission on Human Rights was established by the Church of Scientology to investigate and expose psychiatric violations of human rights. To view the video and/or to report an abuse case go to <http://www.cchrbc.ca>.
