

Kaldeera Announces Workflow Designer for SharePoint 2010 - SharePoint Workflow Made Easy

With Workflow Designer for SharePoint 2010, Kaldeera is challenging traditional barriers to broader adoption of business process automation, including ease of use, cost of ownership, and integration with existing IT infrastructure.

May 5, 2011 (FPRC) -- Kaldeera, a provider of technologies that enhance Microsoft® SharePoint®, today announced the new release of Workflow Designer for SharePoint 2010. With Kaldeera Workflow, business users will have the advanced capabilities they need to provide greater agility and visibility into their business processes.

The new design of Workflow Designer for SharePoint 2010 lends itself to be easily deployed and scalable for enterprise organizations, as well as at departmental levels and within medium-sized organizations. Its scalability and customization capabilities make the product highly usable for non-technical users as well. 'We have been developing a lot of SharePoint solutions for our intranet relative to our business processing and workflow. We found that the ease with which we were able to deploy Kaldeera Workflow worked well for us.' says Pau Codina, Kaldeera CTO.

According to Joan Trilla CEO of Kaldeera, 'This release of Kaldeera Workflow contains the features and enhancements that our customers need to more effectively address their business processes. Kaldeera Workflow also offers a unique ability to automate existing processes without requiring users to change the way they do business – and that is an important differentiator,' he remarked.

Workflow Designer for SharePoint 2010 is built on Microsoft's Windows Workflow Foundation and features an easy-to-use drag-and-drop interface that enables automation of everyday business processes without coding.

Workflow Designer for SharePoint 2010 also provides built-in integration with many third party and in-house applications and databases.

'With Workflow Designer for SharePoint 2010, Kaldeera is offering a flexible alternative to complex and pricey applications. Our exclusive design means that organizations can quickly, and affordably, deploy our product to help them keep pace with the businesses they support -- yet easily scale to meet new and changing requirements,' stated Pau Codina, CTO for Kaldeera. 'Users can experience the benefits of a robust infrastructure that addresses their needs dependably and flexibly.'

Workflow Designer for SharePoint 2010 is available now for download, trial, and purchase on the Kaldeera Web site (www.kaldeera.com).
