

## **Online-spread-betting.com Produces 30 New Fx Spread Betting Guides**

*Online-Spread-Betting.com releases a range of forex trading guides.*

May 5, 2011 (FPRC) -- Online-Spread-Betting.com has released a range of FX spread betting guides. The new in-depth guides cover the popular Euro, Dollar and Sterling based markets. In addition, they also offer investors a guide to the less traded 'minor' and 'exotic' currency markets.

Emma Franklin, Head Editor at Online Spread Betting, said that the new guides will help educate traders, 'The FX markets have always been popular with spread bettors but we felt that there was a lack of free, good quality information on the minor and exotic markets for investors.

'We have released more than 30 free guides and each one reviews a range of important issues. Every guide focuses on a particular FX market from major markets like the EuroDollar spread betting market to the minor markets like the Sterling/South African Rand and exotic markets like the Dollar/Mexican Peso'.

The individual guides cover trading essentials such as which spread betting companies offer the market in question and where to find charts to help with technical analysis. They also include detailed examples of speculating on the FX pair to increase as well as how to speculate on the FX pair to decrease. In each case there is a review of both winning and losing trades.

'We can see the FX markets becoming even more popular and so investors are likely to explore more markets and more opportunities. However, spread betting isn't always straightforward. As such we felt it was important to give readers more detail on not only the popular markets but also the currency pairs that they may have less experience of', concluded Franklin.

About Online-Spread-Betting.com

<http://www.online-spread-betting.com/> is a financial portal offering views on the latest market movements. The site offers daily analysis of the commodities and indices markets, as well as daily trading tips and daily commentary on the FX markets. There's also an in-depth look at individual brokers and the latest trading offers.

Unlike more traditional forms of trading, financial spread betting lets investors speculate on a wide range of markets including the key UK, US and German markets. Spread betting also lets traders speculate on markets to go both up and down. This means that it's possible to make a profit on falling markets as well as rising markets.

Spread betting involves a high degree of risk and it is possible to incur losses that exceed your investment. Please ensure that spread betting fits your investment objectives as it might not be appropriate for all types of investor. Before trading, make sure that you only speculate with funds you can afford to lose and, where necessary, seek independent advice.
