Internet marketing is a well discussed topic and probably one of the best ways to establish a business with a sustainable income. Yet, it is not so easy. Anyone with a computer, an internet connection, a passion for sharing knowledge with others combined with determination will succeed in internet marketing with Chris Mentor Me. Internet technology and internet marketing always fascinated me – I had no other knowledge when I started:

- * My name is Mada Butt and I lost my job due to the recession in June 2010.
- * I realised that despite of my MBA degree & the fact that I successfully managed a company with a turnover of \$ 3 million per annum – one's job and health is always at risk and one is always replaceable.
- * I was 54 years old then and without a monthly income it was only a matter of time before I will be financially ruined.
- * It is also not easy to find a job when the whole world is in recession
- * In addition, what will I do about a pension that is sustainable?
- * Internet marketing being a global venture, held the key. Internet marketing income should be sustainable despite of recession or other local factors. Never did I realise how difficult and costly this new internet marketing journey would be without training like Chris Mentor Me.
- * Starting a new venture, without prior experience, is not only a nightmare; it is also ruining one financially.

I needed the skills! Urgently! Well, some products about internet marketing were helpful, but most internet marketing products were only money making sprees of the sellers. With the Chris Mentor Me training course, I realised that Chris Mentor Me internet marketing training addresses the skills

we need.
