

## **CleanFinancial.com Launch New Contracts for Differences Website**

*CleanFinancial launch a new website focused on CFD trading.*

September 8, 2011 (FPRC) -- The financial spread trading website Clean Financial has launched a new website that focuses on online CFD trading.

The new site, CFDs Online, contains a range of tips and information to help anyone speculating with CFDs, from the novice investor right up to the most experienced of traders.

If you're new to CFD trading or the financial markets as a whole, you will find useful information such as how to trade Contracts for Difference, the benefits and the risks of CFDs trading as well as where to trade online CFDs.

The site will also help the more experienced traders with daily market analysis, CFD broker reviews on firms such as IG Markets as well as views from industry insiders on the state of the financial markets.

Frankie Lawson, senior editor of CFDs-Online.com, has said that Clean Financial will use the knowledge and experience of running a spread betting website in order to build the most comprehensive CFD trading site possible.

"We feel that we are fortunate to be able to build on the experience of a successful financial trading site," she said. "However [www.CFDs-Online.com](http://www.CFDs-Online.com) isn't just a carbon-copy of CleanFinancial.com; we have tailored the site to suit the specific needs of traders and investors who are speculating via Contracts for Difference."

"Regardless of the market that you're speculating on or your level of experience, CFDs-Online.com is full of useful information, tips and strategies."

The London based website will also cover up-to-the-minute financial news on commodities such as gold and crude oil, stock market indices such as the Dow Jones and FTSE 100, forex pairs such as the USD/JPY and the EUR/USD as well as movements in the price of stocks and shares.

### About CFDs Online

<http://www.cfds-online.com/> is a trading website designed to assist any level of CFD trader. The site is updated daily and publishes market analysis, a CFDs blog, a CFDs guide, trading tips, strategies, tutorials, brokers, and CFD prices.

Clean Financial is a financial spread betting website. The site offers a range of information including free spread trading news, broker tips, technical analysis and spread betting company reviews.

CFD trading and spread betting are both financial derivatives that allow investors to make a profit on both a rising and a falling market.

CFD trading and spread betting both involve a high degree of risk. These products are leveraged meaning that you can lose more than your original stake. When investing through such products only speculate with capital that you can afford to lose and always make sure that you recognise the risks involved. Leveraged products may not always be suited to all investors so obtain independent financial advice where you think it is necessary.
