

FinancialSpreads Launches New Financial Spread Betting Charts

Financial Spreads, the UK spread betting company, have upgraded their spread betting charts

October 6, 2011 (FPRC) -- UK spread betting firm, Financial Spreads, have upgraded their spread betting charts. Clients can now access the new and improved charts when they log on to the Financial Spreads website.

Financial Spreads offers more than 2,500 financial markets and clients have always been able to access financial spread betting charts for each individual market. Clients could also add a range of technical indicators and view the charts across a number of different time periods from 1, 2 and 5 minute charts for day traders to daily and weekly charts for investors taking a longer term view.

According to Adam Jepsen, spokesman for FinancialSpreads.com, the new charting package is a significant improvement on the previous offering.

"We still provide charts for every single market on www.FinancialSpreads.com and, in addition to all the standard features an investor would expect from market leading charting software, we are also offering features such as back testing tools and price alerts for when markets hit certain levels".

The range of new features includes:

- * Back Testing tools
- * Email alerts for when the markets hit a user defined level
- * A longer history for shorter time periods
- * More time periods such as 2 hour, 4 hour and monthly charts
- * More drawing features such as Fibonacci times zones, fans and arcs
- * More price display options
- * More indicators
- * A snap High/Low feature for drawing lines

"We're very happy to be able to offer our clients these professional level charts on FinancialSpreads.com and, best of all, they remain free for all Financial Spreads clients," added Jepsen.

Whilst the new charts are user friendly, the financial spread betting company has also added a range of video tutorials to FinancialSpreads.com. The video tutorials cover all the basic charting features such as drawing, zooming and adding/removing indicators, however they also cover how to use the price alerts and back testing.

Before trading, please note that financial spread betting is leveraged and therefore carries a high level of risk to your capital, it may not be suitable for all investors. With spread betting it is possible to lose more than your initial investment and therefore you should only trade with funds that you can afford to lose. Ensure you fully understand the risks and, where necessary, seek independent financial advice.

About Financial Spreads

<http://www.financialspreads.com/> is based in London and is a trading name of London Capital Group (LCG) which is authorised and regulated by the Financial Services Authority. LCG is a company registered in England and Wales under registered number: 3218125. Registered address, 2nd Floor, 6 Devonshire Square, London, EC2M 2AB.
