

SpreadBets.org.uk Releases a Spread Betting Guide

SpreadBets.org.uk launch a brand new financial spread betting guide

October 20, 2011 (FPRC) -- London based financial spread trading site, www.SpreadBets.org.uk, has released a brand new spread betting guide.

The spread betting guide, released this week, looks at a range of areas within the derivative of spread betting, including how financial spread betting works and the importance of risk management.

"Spread betting has many advantages - as well as disadvantages of course - over more traditional forms of financial trading, however one thing is for sure: it is an increasingly popular method in which to trade," said James White, editor. "That's why we've released this easy to follow guide for anyone who is interested in having a spread bet."

The guide covers all of the basics of financial spread betting, including how to spread bet, why to choose spread betting and, arguably the most important of them all, risk management.

However the guide also caters for traders who aren't necessarily new to the field of spread betting, looking at other areas such as which spread betting company to choose, and the latest spread betting offers.

"There's a huge range of spread bettors out there and we like to think that we have something for all of them. That's why, with the new spread betting guide, we decided to include one or two sections for investors who already have a bit of trading experience.

"Regardless of how long you've been trading, you'll still want to know where the latest deals are and which spread betting companies are offering the tightest spreads. That's why this spread betting guide includes a spread betting offers section as well as a spread betting company review of firms like IG Index."

However, far from being a standalone section, the new guide also acts as a hub for the rest of Spreadbets.org.uk, linking to other areas of the site, such as spread betting charts and daily spread betting tips.

About SpreadBets.org.uk

SpreadBets is a financial trading website that provides a range of information about the spread betting markets, <http://www.spreadbets.org.uk/> provides daily editorial content such as financial news and a spread betting blog, as well as other content such as technical analysis and market analysis.

Spread betting is a financial derivative that allows traders to make a profit (and a loss) on both rising and falling markets.

Please note that spread betting carries a high degree of risk and, as such, it can result in losses that

exceed your initial investment. Please ensure that spreads match your trading objectives as they might not be suitable for all investors. Before you start financial spread betting, do make sure that you are fully aware of the risks that are involved. Investors should only spread bet with capital that you they afford to lose. Obtain independent financial advice and guidance where required.
