

AnandSoft Blog Site Launched

Anand Software and Training launches company blog site for keeping the visitors abreast with changes from time to time.

October 20, 2011 (FPRC) -- Anand Software and Training has recently launched the company blog site. The anandsoft blog site was developed using WordPress, and incorporates the most recent updates to the same.

The important features of the blog site include the following:

1. **Menu Section:** This is same as the main site anandsoft.com. The top menu enables users to navigate through the main site seamlessly.
2. **Categories:** Lists important categories of the site. It will be updated as and when required. Currently, it has three categories viz. Network Simulators, rf/Microwave, and Others.
3. **Links:** This section lists important external or internal resource links associated with relevant products or services.
4. **Twitter integration:** One notable feature of the blog site is that it is linked to the company's twitter page. Any twitter updates are reflected on the blog's home page and visitors will be able to view latest announcements on Twitter without leaving the blog site. Anand Software Twitter page is located at http://twitter.com/#!/AnandSoft_com. Please visit the page for any tweets.
5. **Blog Search Button:** The blog search allows users to search through the blog site for any relevant posts or announcements.
6. **RSS feed:** The blog posts are available using RSS feed, the link for which is <http://www.anandsoft.com/blog/?feed=rss2>

It is recommended that members visit the blog page, and post comments that are relevant to the posts. More updates will be made to the site as new products and services are launched.

About Anand Software and Training:

The company, founded in the year 2002, is engaged in the development of websites, software applications development, and networking. The software products offered by the company include network simulators, exam simulators, and others.
