

Dr. Alan Marcus to Present at 10th Annual Endocrine Fellows Conference on Diabetes

Leading diabetes doctor presents information about technology advances in diabetes treatment and new devices available to manage diabetes

November 9, 2011 (FPRC) -- South Orange County Endocrinology, a Southern California medical practice specializing in the treatment of diabetes, infertility, thyroid and metabolic disorders, today announced that Dr. Alan Marcus will be presenting at the 10th Annual Endocrine Fellowship Conference in Beverly Hills, Calif., November 11- 13, 2011.

This international endocrinology conference convenes leading endocrine fellows from the United States and Canada, who are invited for a weekend to participate in a series of interactive lectures. Over the course of the weekend, physicians will learn about the most current diabetes research and acquire advanced training necessary to care for patients with diabetes at the highest possible levels. The conference concludes with a device fair represented by leading diabetes device manufacturers.

Dr. Marcus has been part of the planning committee since the conference's inception in 2001, and is responsible for the conference segment on diabetes management devices and technology. Dr. Marcus will present the initial lecture on the role of technology in advancing diabetes care as well as a hands-on, interactive training in the skills and science for the successful use of technologies in the treatment of patients with diabetes.

Dr. Marcus's Conference Speaking Schedule:

Friday, November 11, 2011

7:15 PM – 9:00 PM Working Dinner

Transformation of Endocrinology Through Technology

Saturday, November 12, 2011 (Section II)

11:35 AM – 12:35 PM Insulin Delivery Devices

About South Orange County Endocrinology (SOCE)

South Orange County Endocrinology is the first medical practice to pioneer the use of insulin pumps and glucose sensors in those with pediatric, adolescent and adult diabetes. Doctors at SOCE are dedicated to treating patients, preventing complications and diagnosing the most difficult symptoms of diabetes. They have participated in studies funded by the National Institutes of Health (NIH) and other organizations aimed at improving the lives and life expectancies of people with endocrine disorders, which includes diabetes, infertility, thyroid and metabolic disorders. The doctors at SOCE are committed to sharing their knowledge and expertise with patients and to developing more effective and selective medical treatments, tailored to the individual patient.
