

Home Power Magazine Recognizes Perlight Solar for Its Collection of High Power Tolerance Panels

Home Power magazine has recognized what twin solar USA has touted for more than a year: Perlight is the “best bang for your buck” solar panel in America.

Home Power’s “2012 PV Module Guide” highlights the importance of buying modules with a high power tolerance, and singles out Perlight’s entire line of solar panels.

Perlight offers more high-power tolerance modules than any other manufacturer in the Home Power buying guide.

LOS ANGELES, CA (November 17, 2011) – Perlight Solar panels placed above more than 50 manufacturers in a recent review by Home Power Magazine for producing High Power-Tolerance modules.

twin solar USA , one of the world’s leading distributors of Perlight Solar panels, is proud to announce Home Power magazine’s recognition of what twin solar USA has been touting for more than a year: Perlight Solar offers the “best bang for your buck” solar panel on the market.

In the December 2011/January 2012 issue of Home Power, the magazine reviews more than 830 modules from more than 50 manufacturers for its “2012 PV Module Guide.”

Home Power (www.homepower.com) touts the importance of buying High Power Tolerance modules, writing:

“Unfortunately, the saying, ‘you get what you pay for’ doesn’t necessarily hold true when you’re paying dollars per watt for PV modules. That’s why you need to pay attention to power tolerance, the percentage that the actual power output of a module can vary from its STC rating.”

The article lists solar panel manufacturers with the best High Power Tolerance modules, with Perlight landing 23 panels in the review, more than any other manufacturer, including placing ahead of names such as BP, Kyocera, Sanyo, Scheuten, Schueco, Solon and Suntech.

twin solar has been witnessing the high quality of Perlight Solar panels for more than a year, with nearly 2 MW of satisfied customers in the U.S., Germany and Italy.

twin solar USA currently has Perlight Solar panels available in both its California and New Jersey warehouses, and ready to ship anywhere between.

Perlight Solar panels offer:

- An industry leading 10-year materials warranty – vs. the standard 5 or 7 years.
- A 25-year power warranty with a better-than-standard 12 years at 90% power, and 25 years at 80% power.
- All positive tolerance of 0 / +5
- Complete worldwide certifications, including UL, IEC, ISO, MCS, TUV and more

- Superior PTC ratings from the California Energy Commission (CEC)
- Modules of all sizes, with best-seller's including 250-watt mono-crystalline, 300-watt mono-crystalline and 240-watt poly-crystalline
- Special-order Ontario and ARRA-content modules available
