

## **New and Improved Quote Form Released to Give Great Insurance Prices for Young Drivers**

*Cheap Insurance Locator has released a new and improved quote form to give young drivers cheaper insurance quotes*

November 23, 2011 (FPRC) -- Fulham, London, United Kingdom - A car insurance comparison system has been launched from the guidance of top UK car insurance businesses to provide a quicker and easier solution to get cheap car insurance for young drivers which is unique as it provides a very speedy and simple to use internet based quote system that was constructed with the help of the top insurance businesses in the UK that prioritise in the cheap car insurance for young drivers area of the market.

As the highest car selling point of the year arrives the increase in young motorists on the roads in the UK increases as many start driving their new cars for the very first time. A number of these new motorists will understand how difficult it is to find cheap car insurance for young drivers.

A number of insurance companies that sell cheap car insurance for young drivers give special discounts to students but these policies can be tricky to come across as often insurers will not aim their advertising budget at young drivers and can often be reluctant to offer policies to this higher than usual risk group.

Fortunately comparing insurance prices has now become a very easy process, but it was not always the case. Previously, pre the times of quote systems on the internet, it could take hours to accumulate just a handful of quotes. Needing to phone up all brokers, chatting for ages to give everyone the same information over and over again, and after all the hassle you would probably not receive anything like the cheap quote you could get from using the new online comparison systems.

Cheap Insurance Locator has developed the answer to this problem and that is the super fast quote system. Having set up relationships with insurers that do provide cheap car insurance for young drivers, they launched a quote form that gives real time results to the visitors after they answer questions on just one form that takes no more than two minutes to fill in. Simultaneously the system creates a table of car insurance prices from many a number of insurers.
