December 29, 2011 (FPRC) -- SimulationExams.com, a leading practice tests provider, revised CompTIA CCNP Route 642 902 practice tests. The exam simulator offered by SimulationExams.com include 250+ questions and provide a simulated test environment for candidates and facilitate taking final exam with confidence. All questions carry detailed explanations. Question types include multiple choice questions, drag-n-drop, and others as normally encountered in the real exam

The exam objectives covered in the practice tests include

- 1: Spanning Tree Protocols,
- 2: Implementing an EIGRP based Solution
- 3: Implementing a Scalable Multiarea Network OSPF based Solution
- 4: Implement an IPv4 based redistribution solution
- 5: Implement Path Control
- 6: Configuring Policy Based Routing
- 7: Connecting an Enterprise Network to ISP Networks
- 8: Implementing IPv6
- 9: Implementing Routing Facilities for Branch Offices and Mobile Workers

The advantages of a simulated exam are:

- Ability to gauge one's preparedness to take actual certification exam
- To prepare for the exam objectives thoroughly from a different perspective (from the study guides)
- To familiarize oneself with actual exam environment (such as timed test, scenario based questions, etc.)

Other Cisco(R) exam simulators available from CertExams.com include Cisco Certified Network Associate (CCNA 640-802), CCNP Switch (642-813), CCNP TShooT, and Cisco Certified Entry Network Technician (CCENT).

The Exam Engine provides an integrated test environment, wherein, the candidate will be able to check for upgrades, and register the full version online using program interface seamlessly soon after purchase. The candidates will be able to download the demo versions of any other practice tests offered by SimulationExams.com using the test engine program interface.
