

## **Internet Video Magazine Posted a Review of the New Canon Vixia HF S11 Dual Flash Memory Camcorder**

*The new Canon Vixia HF S11 Dual Flash Memory Camcorder is a Consumer size camcorder with Pro Features. The Canon HF S11 can record video at the full HD resolution of 1920 x 1080 pixels at a breathtaking 24 megabits per seconds (Mbps).*

October 28, 2009 (FPRC) -- Internet Video Magazine ([www.internetvideomag.com](http://www.internetvideomag.com)) today posted a review of the new Canon Vixia HF S11 Dual Flash Memory Camcorder. [http://internetvideomag.com/Articles\\_2009/102709\\_CanonVixia.htm](http://internetvideomag.com/Articles_2009/102709_CanonVixia.htm)

The new Canon HF S11 can record video at the full HD resolution of 1920 x 1080 pixels at a breathtaking 24 megabits per seconds (Mbps). It does so through a Genuine Canon HD Video Lens with 10x optical zoom. Canon calls its highest quality recording option MXP mode, but if you want to squeeze even more high-def video into the camera's memory, you can step down to FXP mode, which captures 17 Mbps at 1440 x 1080 pixels.

Given the camera's 64 Gigabytes (GB) of built-in memory, MXP affords 5 hours and 55 minutes of video; FXP, 8 hours and 20 minutes.

In addition, you can capture video to an SD/SDHC memory card slot. With the addition of a 32 GB memory card, users can obtain an additional 3 hours of recording time in MXP mode or more than 4 hours in FXP mode.

The Vixia HF S11 Dual Flash Memory Camcorder isn't just about dual flash memory, says reviewer Michael Antonoff. 'It's also about dual end-user appeal. It's for independent videographers who appreciate the quality optics, manual overrides, flexibility in adding external accessories, and ability to record at 24 Mbps – the highest bit rate in the AVCHD format. But it's also for video enthusiasts everywhere who crave the camcorder's auto assistance while chronicling family outings at a resolution that does justice to their full HD TV sets at home.

### **More about Internet Video Magazine**

Launched in 1999, Internet Video Magazine is the premier online resource for those who watch and make Internet Videos. In addition to thousands of great videos, we also feature hundreds of articles about how to shoot, edit, make and post Internet Video. Whether you make Internet video for fun or for business, we have articles and content for you. We also provide reviews of many of the latest Internet video and broadcast video software packages, hardware and books.
