Also, Total Video Converter Online is available for the public now. It is a free online video converter based on E.M. Total Video Converter Command Line version. Without downloading any software, users easily download and convert YouTube and other videos online, or upload your own video and convert it online. Users can also do advanced video editing, batch conversion, quality control and other tasks with CGI or any other server-side scripting language.

Consumers and medias are invited to visit the site www.effectmatrix.com/total-video-converter-command-line/ [view demo](#) to experience the free version and share ideas.

About Total Video Converter:

E.M. Total Video Converter is the leading video converter to work on all popular formats. Most major formats are supported including MP4, SWF, FLV, VOB, AVI, ASF, WMV, AMR, MP3, AC3, OGG, WAV, WMA, and AAC etc.

With years of experience in video converting, Itinysoft.Inc understood some of the common issues when people try to move their loved home video to a modern media like DVD / SVCD / VCD / Apple iPod / PSP / 3GP / xbox360 / I-phone / I-touch / phone / mp4 / Zune / PDA etc. There are many different video formats. Different video software may handle them differently, and often, a video clip plays fine in one application but won't play or play out of sync in another.

Total Video Converter uses standard Microsoft DirectShow components as its foundation that guarantees the compatibility of the encoded video, and often it is the only way to fix out-of-sync problems in some videos.

Total Video Converter has become the 2nd popular downloaded software of the world biggest downloaded website download.com.
