

## **Naturally Homemade Creates New E-Book Detailing How to Make Deodorant At Home**

*Naturally Home Made has worked hard to put together a comprehensive ebook which provides comprehensive information and instructions about making your own deodorant including over 30 different recipes and methods.*

March 26, 2013 (FPRC) -- Today, natural deodorants that feature pure, safe ingredients are becoming more popular. To fill a need in the marketplace, Naturally Home Made has created a new e-book, *How to Make Natural Deodorant: The Complete Guide to Making Natural Deodorant at Home* and it is now available for sale online.

This helpful instant download offers affordable strategies to those who wish to bypass commercially-prepared deodorant formulas, which may be linked with the development of certain diseases, such as Alzheimer's disease. The e-book offers thirty different recipes for homemade, natural deodorant, and it's available via the following website: [www.howtomakedeodorant.com](http://www.howtomakedeodorant.com).

Created by Joanne Borda, this e-book is the culmination of years of research and testing. Through an intensive process of trial and error, Borda isolated the most effective, safe and natural ingredients for natural deodorant. Then, she invented a host of recipes, all of which may be created inexpensively, with ingredients that are simple to find and utilize. Since no other e-book of this type currently exists, downloading this manual will be the simplest way to access this vital and unique information via the World Wide Web.

As she kept testing and tweaking the ratio of ingredients and throwing away the dodgy recipes – Borda had soon discovered over 30 different blends on how to make deodorant in 2 specific categories! Her husband never minded testing out the new recipes and advised that within 3-4 days of discontinuing the use of his 'Old Faithful' commercial deodorants and using the naturally homemade deodorants, that annoying rash he had was gone for good!

And with the money they were saving by learning how to make deodorant at home – Mr Borda is planning their next holiday! Borda was overjoyed when she had finally compiled the best and most comprehensive collection of how to make deodorant recipes she had ever seen!

Since the author is also committed to educating consumers about the hazards of commercially-prepared deodorants that contain a variety of lab-created chemicals and additives, she's created a website that is filled with free information about the perils of typical store-bought deodorants, as well as the benefits of pure, natural homemade deodorants. Those who visit [www.howtomakedeodorant.com](http://www.howtomakedeodorant.com) will be able to read a special blog section that features a range of timely and interesting articles about deodorant.

Articles posted at the website will also include information about Borda's own homemade deodorant recipes and which ingredients they require. Currently, the author is also offering customers access to a trio of e-book bonuses with every order of her *How to Make Deodorant* e-book.
