

## **Cheap Brighton Boilers Launches To Offer Best Price Boilers In Brighton and Beyond**

*Cheap Brighton Boilers is a new business that has launched its web presence to promote its VAT-free service, offering unbeatable customer service and workmanship at the lowest possible prices.*

Brighton and Hove, East Sussex February 7, 2014 (FPRC) -- A boiler is an essential item for the household, creating the heat through the radiators and the hot water in the taps. It can also be a nightmare when something goes wrong, as these essential functions come under extraordinary strain when they are most needed, and as winter comes to an end many boilers are giving up for good. Cheap Brighton Boilers is a new business created by Brighton's leading boiler installer that provides the cheapest boilers, installation and workmanship in the region, and they have just launched a new website to promote their services.

Though they are cheap, they are also a recommended installer for Worcester Bosch, so a low price tag does not mean poor quality- indeed, Cheap Brighton Boilers are cheap precisely because they value customer service above all things. They do not charge VAT on any product or service, and quotes are charged at a flat rate with no hidden extras. As well as Worcester Bosch, the company also provides Vaillant, Glow Worm and Ideal boilers.

The new website includes a rich variety of multimedia content including original, high quality written content which has been broken down to be as transparent and accessible as possible, video content featuring a summary of services and expectations for the company, testimonials, new boiler installation options, sample quotes and more.

A spokesperson for Cheap Brighton Boilers explained, "We supply boilers that come with up to a 7 year warranty, meaning there's never been a better time to replace an aging boiler, or consider replacement as an alternative to repair, which can often run up bills almost equivalent to the cost of a new boiler. By launching our website we hope to make the most of Google's local search matching algorithms, as well as offering free quotes to anyone who visits the site, so a speculative visit can soon become a great deal for everyone involved."

About Cheap Brighton Boilers: Cheap Brighton Boilers is proud to be a recommended installer for Worcester Bosch. Cheap Brighton Boilers is committed to delivering the highest standard of workmanship and customer service. Cheap Brighton Boilers delivers high-quality gas boiler and central heating installations and systems with no VAT and will attempt to beat any competitors quote.
