

Demon's Cycle Updates its Range of Harley Headlights

Demon's Cycle has updated its range of custom and replacement headlights. Designed primarily for Harley-Davidson's these all metal lights are what every safe rider needs.

March 29, 2014 (FPRC) -- Demon's Cycle Inc., a custom Harley motorcycle builder and custom motorcycle parts supplier, is pleased to announce that it has updated its range of headlights. The updated range includes almost every type and style of Harley-Davidson headlight from simple replacements to full custom designs.

A motorcycle's headlight is both a design statement and a safety necessity. On the one hand the headlight reflects the style and image of a motorcycle. It is the thing that people often notice first. If design was a language then the headlight would be the capital letter at the start of a sentence.

On the other hand, the headlight is essential for road safety, not only for the rider but also for all other vehicles that are on the road. A cracked or broken light is a safety hazard which, in the worst case scenario, can lead to road traffic accidents.

"The headlight is one of the first things people notice on a motorcycle. It is easy to replace and can change your motorcycle's look," said Tom Steinbacher, owner of Demon's Cycle. "Most of our headlights come with H4 halogen bulbs that provide great hi-low beam performance. Also projection style headlights add that extra level of safety to a night ride."

The updated range of headlights include models in chrome and black finish and most of the headlights come complete with a mounting block. Although most of the items in the new range are designed for Harley-Davidsons, they will actually fit any motorcycle.

Demon's Cycle is also pleased to announce that all of its headlights are made from metal with real glass. The company advises consumers to avoid cheaper plastic lights with plastic lens.

About Demon's Cycle

Based in Pompano Beach, South Florida, Demon's Cycle is a multi-million dollar international custom motorcycle wholesale parts company. It was started more than nineteen years ago by Tom Steinbacher and has developed a reputation as a pioneer of radical motorcycle designs, euro style bikes and custom Harley chopper concepts. As well as building custom motorcycles and selling rolling chassis, Demon's Cycle specialize in the sale of custom parts for Harley-Davidson motorcycles. They offer a wide range of parts including handlebars, hand controls, tires, gas tanks and turn signals.
