

## **Serov1.tk Analyzes Serovital Latest HGH Based Anti Aging Products Claims**

*There is a boom in HGH based anti aging products right now and the latest to enter the market might be making the biggest promises yet, amid growing concerns over misleading hard-sells.*

Johnson City, TN, September 9, 2014 (FPRC) -- HGH, or Human Growth Hormone, is a peptide hormone that stimulates growth, cell reproduction and regeneration in humans, and has been a hugely exciting discovery for a great many reasons, and is now applied to diet plans, men over 40 seeking to increase their virility, and more. The latest application has been anti aging beauty products, which have started to flood the market with bold claims that remain largely untested. HGH injections may help muscles rejuvenate, but can HGH cream really help turn back the hands of time for skin many people are asking.

The newest product to enter this already crowded market with bombastic claims of peerless efficacy is Serovital, which has been the subject of a special report at <http://serov1.tk/>. The supplement promises to be a fountain of youth which increases hormonal chemicals by up to 600% to all but reverse the aging process entirely.

Many competitors such as HGH Factor make similarly bold claims on websites like <http://hghsupplement.liftactiv.ca/> , suggesting that such hard-selling is rife within the industry and all labels are forced to out-do each other in the hyperbole stakes. If one brand could deliver on such promises, they would be sure to corner the market.

Despite the advertising and marketing obscuring the reality with such bold promises, there are facts on HGH available online (<http://whatishgh-factsandbenefits.rhcloud.com/> ) that can help people understand the real benefits of these products without resorting to over hyped claims.

A spokesperson for Serovi1.tk explained, "We understand why people may be skeptical or even cynical about this product, and competitors have not done the market many favors in this regard, with low quality products and low levels of the active ingredient which understandably produce dubious results. We believe this product is the genuine article, and we are willing to prove that by sharing the science on our website. We have taken some time to look into the claims and anybody interested in HGH should check out our findings."

About Serov1.tk: Serovital is a new anti-aging, HGH hormone based serum for the face and skin and Serov1.tk looks at its claims with a special report. For more information on Serovital, please visit: <http://serov1.tk/>
