

CertExams.com Releases CCNA Security Practice Tests

CertExams.com release Cisco Certified Network Associate (Security) practice tests conforming to the latest exam objectives. The practice tests consist of 250+ questions with explanations.

January 31, 2015 (FPRC) -- CertExams.com released Cisco Certified Network Associate Security, CCNA Security practice tests for thorough exam preparation. The practice tests consist of 250+ questions with flash cards. The question types offered by the simulator include Multiple Choice Single Answer (MCSA), Multiple Choice Multi Answer (MCMA), Drag and Drop, and testlets.

The CCNA Security Certification simulator mimics the actual exam with similar difficulty level, and exam environment. Further, the test engine offers two modes: Learn mode, and Exam mode. Learn mode is useful for candidates to step through the questions and learn the concepts behind each question. Exam mode is useful for candidates preparing for final exam preparation.

The CCNA Security practice exam objectives include the following:

1. Common Security Threats
2. Security and Cisco Routers
3. AAA on Cisco Devices
4. IOS ACLs
5. Secure Network Management and Reporting
6. Common Layer 2 Attacks
7. Cisco Firewall Technologies
8. Cisco IPS
9. VPN Technologies

Category wise scoring is available, and candidates will be able to repeat the exam with bookmarked questions.

About CCNA Security: Cisco CCNA Security is among the most widely recognised certifications in the field of network security using routers and switches. CCNA Security candidates will be able to harden networks for small and large organizations.

Other practice tests available from CertExams include CCNA, CCDA, CCNP, ICND2, A+ Essentials, and Network+. Please visit the website for complete list of available practice tests.
