

## Sebesta Participates in ACRP Report 139

*The Transportation Research Board, an authority on transportation innovation and progress, recently published ACRP Report 139, a Sebesta-authored guidebook that offers enhanced airport operations and management practices.*

October 27, 2015 (FPRC) -- ST. PAUL, MINN. – [www.Sebesta.com](http://www.Sebesta.com): The Transportation Research Board (TRB) recently published ACRP Report 139: “Optimizing Airport Building Operations and Maintenance Through Retrocommissioning: A Whole-Systems Approach.” The report includes guidance on retrocommissioning in airports and case studies from international and regional airports. It also features a spreadsheet tool to help practitioners evaluate and select appropriate facility optimization measures based on cost, savings, complexity, visibility, and greenhouse gas savings. Airports looking to facilitate sustainability and reduce operating costs through enhanced O&M practices will find the guidance and recommended practices extremely valuable and practical.

Sebesta authors of ACRP Report 139 and accompanying materials include: Abbe Bjorklund, Corinne Wichser, Jessica Parks, Kristina Bach and Mary Terrell, all of Sebesta.

The ACRP research team will be presenting at the TRB Annual Conference in Washington, D.C., in January 2016, as well as conducting an ACRP webinar in February 2016, which will highlight their findings and practical applications. Bjorklund, one of the authors, also presented on the report at the ACI-NA annual conference held in Long Beach, Calif., in October.
