

## **AAI Driveway Gates Launches Free Design Consultation To Help Individuals Get The Best Gates Possible**

*AAI Driveway Gates is now offering a free initial consultation to explore the possibilities for automated gates and more in Auckland properties.*

San Francisco, CA -- February 1, 2016 (FPRC) -- The driveway is the royal road to the home, and many people seek to install gates to separate their territory from the broader roadway, as well as offer increased protection and deterrents against potential criminals. Auckland New Zealand is a beautiful city, and many homeowners there want something more from their gates than simple security. AAI Driveway Gates can help provide that, with beautiful, stylish and secure gates. They are now offering a free initial consultation complete with draft designs to help people envision how their gates can become an extension of their own personal expression.

The AAI Driveway Gates initial consultation will look into the unique properties of each space, as well as the opportunities and challenges it provides. The company will then discuss the possibility for automated and manual aluminium gates of varying shapes and sizes, using high quality aluminium to produce stunning designs, which can begin to be drafted right there and then.

The AAI Driveway Gates finished products include sliding gates, double gates, automated gates and even advanced security features like an intercom and security keypad. The gates themselves are lightweight yet incredibly strong, and more energy efficient as a result, saving homeowners money in the long term.

A spokesperson for AAI Driveway Gates explained, "We are happy to be able to help people develop a clearer sense of their vision for their space and we are well aware what an important part gates play in that process. For most all visitors, the gates will be the first impression they get of the home and as a result, the person who lives there. As such, investing a little in quality design and high quality materials is essential. We do everything we can to maximize the value of our products, ensuring everyone gets the perfect gates for their space and tastes."

About AAI Driveway Gates: AAI Driveway Gates brings together two strands of founder Dave Dalton's career, as both a toolmaker and builder involved in aluminium manufacture and installation for more than 20 years. They offer an uncompromising standard of work and a clear vision about the possibilities of architectural aluminium, which includes a comprehensive and varied range of driveway gates.
