

All Metal Fab Steel Buildings, INC. Unveils Exclusive 2016 Building Specials

The simple truth is that metal buildings are the future of construction. See how All Metal Fab Steel Buildings' specials are putting them within clients' reach at <http://www.amfsteel.com>.

Parker, CO -- February 1, 2016 (FPRC) -- Steel roofs and buildings have long been known for both their longevity and sustainability. Not only are they very strong and provide protection against leaks, but they are also highly energy-efficient and known for their unmatched longevity.

It is with this knowledge in mind that All Metal Fab Steel Buildings, INC. is unveiling their exclusive building specials for early 2016. This company is a choice provider of steel frames, Pole Barns, and metal buildings throughout the Rocky Mountain Region and the Midwest. Those who wish to learn more about these exclusive specials and see what All Metal Fab Steel Buildings, INC. has to offer can visit www.amfsteel.com .

Mitch, a spokesperson for All Metal Fab Steel Buildings, stated "Every year we design and build steel buildings for property owners that need extra space for cars and storage, churches and schools for local communities on a strict budget, and steel equestrian arenas and barns for horse-lovers throughout Colorado and the Midwest. Metal buildings not only provide clear advantages like durability, energy-efficiency, and design flexibility, but they are quick and economical to build, reducing both costs and frustrations. The introduction of our exclusive specials makes it even easier for those who have need of a steel structure to get one from us."

Mitch goes on to say, "We have several specials available right now, and the price and cost savings for each will vary depending upon the size and type of building needed. Our 32' W X 45' L X 12' H option currently saves clients over \$6,000, while they can save nearly \$43,000 on the sale price of our large 100'W X 200'L X 18'H building. Each building includes two large framed openings and are strong enough to withstand winds of up to 100 miles per hour."

"Simply put, there's no denying that the kind of Metal Buildings we build are the future. They are convenient, strong, durable, and efficient in every way. We are excited to bring these current specials to our clients and give them the opportunity to get exactly what they need at some of the most affordable prices in today's steel building market."

About All Metal Fab Steel Buildings, INC.

All Metal Fab Steel Buildings, Inc. has over 20 years of experience in the steel building industry.
