

## **Paramount Pool Products Launches New Range of Luxury Stainless Steel Pools**

*Paramount Pool Products has extended its range of pools to include a new series of stainless steel items with a stunning finish that will suite any contemporary space.*

Hook, Hampshire -- February 16, 2016 (FPRC) -- Having a pool is a status symbol, and a great way to relax and unwind during the hotter months of summer. As winter now comes to an end many people are already looking ahead to the brighter months, and are considering an investment in a new swimming pool to help make their garden a social focal point. Paramount Pools has now introduced an amazing new range of luxury stainless steel pools, offering the perfect finish together with affordable and durable construction.

The pools are manufactured from Marine Inox stainless steel, laser cut and then welded into steel-framed section, enabling the pools to be installed either above ground to showcase the finish or below ground to offer a seamless look as the water and steel both catch and reflect the light.

The stainless steel offers durability, functionality, affordability and a completely watertight finish, reducing the cleaning and maintenance costs and providing ultimate peace of mind. Available from 4-10 metres in length, delivered ready-formed in one piece for ease of installation. The pools are available as a fixed size or bespoke item, with consultation, structural drawings and design implementation by Paramount Pool Products' team of experts.

A spokesperson for Paramount Pool Products explained, "Our new stainless steel swimming pools offer people an amazing contemporary edge to their homes, and provide a pool that really makes a statement while at the same time being affordable and easy to maintain. Because we deliver them fully manufactured and ready to install, customers needn't worry about any construction complications. We have created an image gallery of these pools in situ together with a video of one in action, so people can imagine clearly how it will sit in their space before purchasing. We look forward to installing these beauties around homes throughout the UK in 2016."

About Paramount Pool Products: Established in 1979, Paramount Pool Products have supplied only the very highest quality above and below ground pool kits to both professional swimming pool installers and DIY enthusiasts. They offer indoor and outdoor pools with any desired extras, including safety covers, fabric domes and fencing, solar heating and heat pumps, lighting and even toys and games.
