Maxprog is proud to present a new release of its personal finance software, iCash, available now on Maxprog website with several interesting new features.

August 31, 2016 (FPRC) --
Los Angeles, CA June 19, 2016 -- Maxprog is proud to present a new release of iCash, new version 7.5.8, available now on Maxprog website with a lot of new features and improvements.

http://www.maxprog.com/site/software/personal-finance/icash_sheet_us.php

iCash is a personal finance software designed to track incomes, expenses, credits, debts and banks transactions. It offers unlimited categories, multiple accounts creation, multiple currencies, a SQL backend engine, password protection, export/import routines, search functions, and drag & drop support. Available for Mac OS X and Windows in English, German, French, Spanish, Swedish, Italian, Dutch, Russian, Polish, Czech, Japanese, Korean, Chinese and Portuguese.

iCash can serve several small accounting needs for either private users, or clubs, associations, self-employed, small businesses or simply to be used at home, making keeping track of incomes, expenses and Bank transactions a snap. With a few clicks you can begin creating accounts and making transactions in minutes.

iCash is versatil and user-friendly. For this reason it doesn't use the principle of double-entry bookkeeping making it much easier to be used by people with very little or no accounting knowledge at all. Simply create accounts for all your expenses, incomes, Banks...and start moving money between them. iCash will then allow you to find out where all your money comes from and where it goes. All accounts are well organized according to user-defined categories and built-in types so reports can be tailored to include all records or only ones meeting specified criteria. iCash also allows you to have as many money manager documents as necessary so you can control almost anything from Clubs, associations, home and so on at the same time.
