

Ithervers: A new eZine full of adventures and maps for any RPG tabletop game system

Monthly ePub packed full of pre-written RPG scenarios for use in any table-top system or game setting using our quick conversion tables, project launched on Kickstarter

December 29, 2016 (FPRC) --

Game Masters find themselves, searching high and low for pre-written, play-tested, adventures and material that will work with THEIR setting and more importantly, THEIR game system.

Medieval Fantasy
Western Frontier
Space Marines & Pirates
Gnarly Sea-Faring Pirates
Post-Apocalyptic Mutants
Super Heroes & Villains
Zombies
Modern
Horror
etc..

IT DOESN'T MATTER!

ITERVERSE is a monthly e-publication (or e-Magazine if you will) that will be packed with just what the gamer needs. EVERY MONTH, as a subscriber, they receive an email link to the latest release (and depending on how our stretch goals go, we very likely may offer printed and mailed versions), but I don't want to get ahead of myself.

VERY IMPORTANT NOTE: These adventures, scenarios and encounters have been designed to work in ANY game setting and easily convertible to ANY game system. Emphasis on EASY!

The Ithervers motto is "It's YOUR game, play by YOUR rules" and we're not changing the games in the slightest, only providing gamers with exciting new content and an easy way to use it.

DISCLAIMER: Now let me clarify - we will NOT violate copyright policies for all those great systems out there, and state that what we write is out-of-the box compatible.

What we are saying is that the ITHERVERSE conversion system is EASY to use and allows the GM to convert our numbers to the numbers they need.

Adventures, Maps, Scenarios, Traps, Monsters, Tactics, Tools and a ton of unique gaming aids are in store for the subscriber.
