Global Home Healthcare Market is growing at a rapid pace and is expected to grow at a CAGR of around 9% by the end of the forecasted period from 2016-2022

The global home healthcare market has been examined to be rapidly growing and is expected to continue this growth in future. In the home healthcare industry, the growing interest for affordable healthcare solutions is one of the key factors driving the development of this market presently and is expected to continue this growth in the future. In the recent decade, the cost of healthcare has been rising relentlessly around the globe. In developed nations like the United States, the healthcare cost expanded quickly, and this growth is due to increment in the costs of medications, therapeutic devices, and healthcare center administrations. Home healthcare solutions includes health monitoring devices and other services that can be used by patients in the comfort of home and at a fraction of the cost compared to the cost of hospital care. Though these solutions have assured limitations in case of acute symptoms and diseases, majority of the cases can easily be solved with the help of home healthcare solutions.

It is projected that factors such as technological advancements in the field of home healthcare is expected to boost the market in the coming future. In recent times there have been growth in home healthcare devices with new devices coming in such as safety lancets which permits patients to monitor their glucose levels in their homes rather than taking help of any healthcare professional or a diagnostic center. Home Healthcare Market Growing at Rapid Pace and Reach USD 122 Billion by 2022 with CAGR of 9%
