

Thermalabs Tan Enhancer to Ship with an In-depth Tanning Guide

Supremasea's Tan Enhancer will now ship with an in-depth guide, in a move to educate consumers

February 22, 2017 (FPRC) -- Supremasea, the company behind Tan Enhancer, has said that it will include an in-depth tanning guide with each unit shipped out. Kristina Meyers, the brand manager at Supremasea, has said that this move is intended to better educate consumers on the pros and cons of various tanning practices. The guide will also outline various tanning methods, and inform users how they can make the best out of each self-tanning session.

Supremasea is a premium sub-brand owned by Thermalabs, the world-popular manufacturers of cosmetics and beach-related products. Launched back in 2014, Supremasea runs a major production facility in Galilee, Israel. A team of scientists and skin care researchers stationed here are always working to come up with industry-changing skincare products. Most products by Supremasea are designed from Dead Sea mineral salts, usually in combination with other ingredients that are popular in the skin care industry.

Tan Enhancer was the first-ever product to be released by Supremasea. It's a premium lotion that enhances the results of tanning. That probably explains why it's quite popular with tanning buffs. According to Supremasea, Tan Enhancer maintains that radiant glow after a tan. It's ideal for individuals who do not want to keep reapplying their tan every once in a while. The product is also enriched with Vitamin E, and Dead Sea Salts. It moisturizes the skin and protects it from environmental pollutants such as free radicals. Thermalabs has said that its tan enhancing lotion should be applied at least 4 hours following a tanning session.

Other quality products that the company has launched include the Lavender body scrub exfoliator, the Vanilla Patchouli body scrub exfoliator, and Shea Body Butter. The Lavender and Vanilla Patchouli are quality exfoliators based on Dead Sea salts and unique ingredients such as olive and avocado oil. Shea Body Butter, on the other hand, is a triple moisture formulation that enriches the skin and combats common skincare problems such as wrinkles, scars, and dry skin. The product blends Dead Sea salts with Shea Butter and essential oils that replenish the skin.

"Moving forward, we'll include a free in-depth tanning guide with each unit of Tan Enhancing lotion shipped out from our premises. This is in line with our commitment to do more to educate consumers this year. The guide will feature important information regarding the practice and motivations behind tanning. It will also highlight various choices that consumers have, and explain how they can make the best out of each session. Supremasea is happy to add value to its users around the world. We want to make sure that people are really knowledgeable when it comes to self-tanning and the use of various tanners and cosmetics. This detailed and significantly long guide will serve as a handy sourcebook for our readers..." said Ms. Meyers.
