

Tent World's Saturn Tent Now Available

Tent World's new Saturn tent is now available in the market.

February 22, 2017 (FPRC) -- Saturn, a brand new tent released by Tent World recently, is now available in the market. Saturn is a significantly large tent that can cater for the needs of a small family in any outdoor location. It's one among 9 different products that Tent World has launched over the last 2 years. Ann Spencer, the brand manager in charge of Tent World, has said that this product is now available to customers within the United States and some parts of Europe.

Tent World is a premium maker of top-quality sports and outdoor tents. Launched back in 2015, this brand has been a major game changer in the industry. Their original tent, named Mercury, performed incredibly well in the market. It featured a protective coating that kept occupants safe from the sun's dangerous UV radiation. The American Cancer Society has said that over 3 million Americans are diagnosed with skin cancer annually. The Mercury beach tent also featured side pockets that could be filled with sand to provide extra flexibility in the beach environment. It had an extra-soft bottom that was highly comfortable to kids.

Other popular tents that Tent World has introduced recently include the Sun and Pluto. The Sun is effectively the largest product in the Tent World lineup, big enough to shelter a sizeable group or small family from rain, scorching sun, and excessive wind. It can be used at the beach, at a camping site, at a picnic location, at a public park, and in any other outdoor location for that matter. Pluto, on the other hand, is the smallest tent in the Tent World lineup. This tent is in fact so small that it's designed for use by kids and toddlers. Other tents include Venus, Mars, Jupiter, Saturn, Uranus, and Neptune.

Each of Tent World's products is named after a planet in the solar system, based on its relative size. That probably explains why 'The Sun' is the biggest tent, and why Pluto is the smallest.

Tent World's Saturn outdoor tent is named after planet Saturn. It has an SPF 30 coating to protect occupants from the sun's UV rays. The tent also features an instant pop-up mechanism that allows users to either open or fold it down with seconds. According to Ms. Spencer, the Saturn tent can be used for fishing, camping, as well as on the beach. It can be set up in the private garden to create a shelter where kids can play without worrying about the wind, or the sun. This tent comes with a classic mat that's extra-comfortable. More so, the Saturn tent ships with a compact carry bag for travel convenience. Ms. Spencer has said that customers can get this product from Amazon.com.
