

Thermalabs Spray Tan Tent Launches in Europe

Thermalabs popular spray tan tent is now available in the European market

March 23, 2017 (FPRC) -- Spray Tan Tent, a popular spray tanning shelter by Thermalabs, is now available in the European market. Thermalabs today said that this product will be available to customers in the United Kingdom, France, Germany, Spain, Italy, and a handful of other European markets. This move comes a time when the company is working to boost its global market. Over the last few months, Thermalabs has launched all sorts of products from beach tents to tanning machines in the UK and other European markets.

Thermalabs is a premier manufacturer of self-tanning accessories based in the United States. The company is popular for its highly organic range of self-tanning lotion, as well as its universal tanning accessories. Some of the most popular launches by Thermalabs include the Original self-tanner, the Ultimitt tan applicator mitt, the Protectan sunscreen lotion, and a range of other products. The original self-tanner was a tanning formulation based on organic ingredients such as Aloe Vera, green tea, and Olive oil. On the other hand, the Ultimitt is a tanner applicator mitt that works with all brands of self-tanners, not just Thermalabs. The product works to eliminate problems common with traditional tanning sponges. According to Thermalabs, the Protectan sunscreen lotion is a moisturizing lotion that also protects the skin from the sun's harmful radiation.

So far, Thermalabs has furnished the market with nearly three dozen different products. The company has also segmented into three distinct sub-brands. Thermalabs supremasea is the sub-brand in charge of the company's skincare products that are based on Dead Sea salt. Tent World, the company's second sub-brand, manufactures classic outdoor shelters. Thermalabs Organic Healthcare creates healthcare products by relying on the teachings of the Rambam, a preeminent Jewish physician who lived over 100 years ago.

Thermalabs Spray Tan Tent serves a shelter where people can spray tan without having to worry about messing up the environment. The tent is available in a variety of colors, and is large enough to fit all users. Thermalabs has also said that this product can be opened or folded easily after use. The tent works with all types of spray tanners available in the market.

A marketing coordinator at Thermalabs, Alex Howard, said, "Moving forward, our spray tan tent will be available in the European market. Customers in the UK, Germany, France, Italy, Spain, and a few other countries will be able to access this product from online marketplaces such as Amazon. We are also working on having our tanning products available in Asia and many other promising markets. Thermalabs goal is to furnish its users with top quality products that help them look more beautiful, but without putting health considerations on the altar..."
