

Cloud-enabling Technologies Market 2017 by Virtualization, Type, A&M solutions, Analysis and Forecast To 2021

Cloud-enabling Technologies Market, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years.

Cloud-enabling Technologies Market, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. April 10, 2017 /MarketMedia/ -- Cloud computing is the use of computing resources that are delivered to customers with the help of Internet. The evolution of cloud computing has led to the emergence of cloud-enabling technologies such as virtualization, automated computing, and service-oriented architecture (SOA) technologies. Cloud computing enables enterprises to use these technologies without having a deep understanding or expertise of how they function. Virtualization refers to the technique of creating a virtual version of the physical infrastructure and is the most popular among cloud-enabling technologies. It reduces IT costs and improves the agility of the business. After the emergence of cloud-enabling technologies, IT operations are being automated, and resources are being supplied on demand. SOA refers to a collection of services that can be integrated and offered as cloud-based solutions to enterprises. Advances in these technologies have led to the increased adoption of cloud-based services worldwide.

Publisher's analysts forecast the global cloud enabling technologies market to grow at a CAGR of 8.84% during the period 2017-2021.

Covered in this report

The report covers the present scenario and the growth prospects of the global cloud enabling technologies market for 2017-2021. To calculate the market size, the report considers the revenue generated from the adoption of virtualization, automation and management (A&M) and service-oriented architecture (SOA) solutions for cloud environments.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Publisher's report, Global Cloud Enabling Technologies Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- BMC Software
- CA Technologies
- Citrix Systems
- HPE
- IBM
- Microsoft
- Oracle
- Dell (VMware)

Get Sample of the Report at: <http://www.reportsweb.com/inquiry&RW0001713473/sample> .

Other prominent vendors

- Adaptive Computing
- Brocade Communications Systems
- Fujitsu
- Huawei Technologies
- Infosys
- NEC Corporation
- Puppet
- Red Hat
- SAP
- ServiceNow
- Tata Consultancy Services
- Veeam Software
- Wipro

Market driver

- Decrease in the cost of cloud-enabling technology solutions.
- For a full, detailed list, view our report

Market challenge

- Vendor lock-in between traditional physical infrastructure and software solutions.
- For a full, detailed list, view our report

Market trend

- Growing implementation of software-defined networking (SDN) .
- For a full, detailed list, view our report

Table of Contents

PART 01: Executive summary

PART 02: Scope of the report

PART 03: Market research methodology

PART 04: Introduction

PART 05: Market landscape

PART 06: Five forces analysis

PART 07: Market segmentation by end-user

PART 08: Geographical segmentation

PART 09: Decision framework

PART 10: Drivers and challenges

PART 11: Market trends

PART 12: Vendor landscape

PART 13: Key vendor profiles

PART 14: Appendix
