

Supremasea Lavender Body Scrub Exfoliator Available in the UK

The Lavender body scrub exfoliator by Supremasea is now available in the UK market

August 12, 2017 (FPRC) -- Supremasea has said that one of its most popular products, the Lavender exfoliator body scrub, is now available in the UK market. This comes at a time when the company is looking to expand its market presence and establish itself as the go-to provider of quality skincare products in the market. Over the last few months, we have seen Supremasea introduce a few of its products, including the Shea Body Butter and the Vanilla Patchouli Body Scrub Exfoliator, in some of the leading European markets.

Supremasea is a sub-brand by Thermalabs, one of the leading producers of self-tanners and cosmetics products in the world. In addition to Supremasea, Thermalabs also owns other sub-brands namely Thermalabs Air, Tent World, and Thermalabs Organic Healthcare. Thermalabs Air is the company's division that creates airbrushing machines and airbrushing accessories. Thermalabs Tent World is an emerging firm that manufactures beach and outdoor tents, while Thermalabs Organic Healthcare is the firm's branch in Israel that creates organic health products based on 100% bio-organic ingredients.

Established back in 2015, Thermalabs Supremasea is an entity that creates skincare products based on a special blend of Dead Sea salts and conventional skincare ingredients. The firm's first product, the Tan Enhancer lotion, was a major hit in the market. This was a moisturizing lotion that was designed to maintain that radiant glow after a tan. The product featured a combination of Dead Sea salts and Vitamin E, which protects the skin from free radicals and other environmental pollutants. According to Supremasea, the Tan Enhancer was a top product for people who are concerned about re-applying their tanner every few hours. It maintains that beautiful glow and at the same time helps achieve a smooth and youthful-looking skin.

In addition to Tan Enhancer, other products by Supremasea are Shea Body Butter, Vanilla Patchouli body scrub exfoliator, and the Lavender body scrub exfoliator.

Thermalabs Lavender body scrub is an exfoliation lotion that's created from a combination of Dead Sea salts and organic ingredients. The product is designed for use by individuals who might have acne, ingrown hairs, blackheads, age spots, cellulite, eczema, and anyone who might just be looking to deep cleanse towards a smooth and healthy skin. According to Supremasea, this particular product is a great choice for users who are wary about chemical-based exfoliation lotions and are looking for a healthy product that they can count on. Kristina Meyers, Supremasea's brand manager, has said that in the UK can acquire this product online via Amazon.co.uk.
