

Supremasea Lavender Body Scrub Exfoliator Available in Italy

Supremasea has introduced its Lavender exfoliator in the Italian market

September 29, 2017 (FPRC) -- Supremasea today introduced one of its most popular products, the Lavender body scrub, in the Italian market. This is a premium exfoliation product that's based on a special blend of Dead Sea mineral salts, and conventional skincare ingredients. This is the third product that the firm has introduced in the Italian market over the last few months, as it seeks to establish itself as the go-to supplier of quality skincare products in the market. Supremasea has also recently introduced its products range in the UK, Germany, and a few other European markets.

Established back in 2014, Supremasea is a significant producer of quality skincare products. The firm is owned by Thermalabs, the US-based large manufacturer of self-tanner and cosmetics products. Alongside Supremasea, other industry firms owned by Thermalabs include Tent World, Organic Healthcare, and Thermalabs Air. Tent World is an emerging firm that distributes beach and outdoor tents around the world. Organic Healthcare is a Thermalabs company that creates organic health products based on 100% bio-organic ingredients. Lastly, Thermalabs Air is a new but fast-growing company that creates airbrushing machines and accessories.

Supremasea manufactures quality skincare products based on Dead Sea mineral salts. The firm operates a large production center in Israel's Galilee region, where top skincare specialists work around the clock to come up with products that can sufficiently tackle the needs of consumers. When Supremasea opened in 2014, it started out with an initial product known as the Tan Enhancer. This was a lotion-based formulation that was designed to maintain that radiant glow after a tan. Tan Enhancer also doubled up as a moisturizer and protected the skin from free radicals and other environmental pollutants. Today, Supremasea has added three more products to its inventory. These are the Shea Body Butter, the Vanilla Patchouli, and the Lavender body scrub exfoliators. The Shea Body Butter is a special skin care lotion that has healing properties and is thus recommended for individuals who suffer from common skin problems.

The lavender body scrub exfoliator is a premium exfoliator that is created from a special blend of Dead Sea salts and conventional skincare ingredients. The product contains Sweet Almond oils, Wheat Germ oil, and other unique constituents that have immense benefits for the skin. Supremasea has said that its Lavender exfoliator is ideal for individuals who are looking to get a skin-nurturing exfoliation without having to worry about adverse chemicals.

Kristina Meyers, a brand manager at Supremasea, has said that users in Italy can obtain this product online via Amazon.it.
